1 Development of an intermediate course for applications programming 77%
Thomas L. Gerber
Proceedings of the seventh annual conference on SIGCPR June 1969
There was much to be learned from the development of ICAP-we learned to be a little more hesitant about taking on a task of that difficulty again. ICAP taught its developers a great deal, because ICAP is an unusual, perhaps unique course. The idea of ICAP originated during November, 1965, in the minds of a select group of members of the Selection, Evaluation, and Training (SET) Committee of GUIDE. Their original desire was to produce an advanced programming course, but as they di ...

2 Tablet: personal computer of the year 2000 77%
B. W. Mel , S. M. Omohundro , A. D. Robison , S. S. Skiena , K. H. Thearling
Communications of the ACM June 1988
Volume 31 Issue 6
A design represents a compromise between conflicting goals, and the design of the personal computer of the year 2000 is no exception. We seek something that will fit comfortably into people's lives while dramatically changing them. This may appear to be a contradiction that cannot be reconciled. But if the technology does not fit easily into the habits and lifestyles of its human users, it will be discarded by those it was meant to help. And if this new tool does not change the life of its ...

3 DVI—a digital multimedia technology 77%
G. David Ripley
Communications of the ACM July 1989
Volume 32 Issue 7
A digital presentation technology that manages anything from text to full-motion video has the potential of expanding the usefulness of personal computers, while rendering them less intimidating.

4 Illustrative risks to the public in the use of computer systems and related technology 77%
Peter G. Neumann
ACM SIGSOFT Software Engineering Notes January 1996
Volume 21 Issue 1

5 Key to effective video retrieval: effective cataloging and browsing 77%
Dulce Ponceleon , Savitha Srinivasan , Arnon Amir , Dragutin Petkovic , Dan Diklic
Proceedings of the sixth ACM international conference on Multimedia September 1998

6 Web-based customer decision support systems 77%
Robert M. O'Keefe , Tim McEachern
Communications of the ACM March 1998
Volume 41 Issue 3

(88%) **Speech Technology 2000**

February 01, 2000 - Communications Convergence Magazine

The much-heralded "voice-enabled web" story has mushroomed. Meanwhile, ASR is starting to grab measurable DTMF market-share throughout the telephony industry, especially in call centers.
